

plasterboard for ceilings

The question of quality versus speed has always been a contentious one in interior design. Economics and demand require buildings to go up quickly and affordably, which can compromise quality. JUMBO® Plasterboard offers an alternative solution for internal walls and can be used for both residential and commercial ceiling applications. JUMBO® Plasterboard is also used to form bulkheads, create curved ceilings, floating ceilings and radiused walls. An extremely versatile product which can accommodate innovative and creative design features, JUMBO® Plasterboard achieves the aesthetic requirements of the design without the necessary drying time for alternate wet trade solutions. All our JUMBO® products are compatible with our ceiling and partition systems.

Features and Benefits

- Quick and easy to install
